Attention: Mr. Bryan French

Dear Mr. French:

The National Search and Rescue Secretariat (NSS) has reviewed the documentation and test reports that you provided as well as the approval certificate issued by COSPAS-SARSAT and have decided that the ACR PLB-375 model satisfies the requirements of COSPAS-SARSAT and the Performance Standard for 406 MHz PLBs. Therefore, these models can be considered as meeting the requirements of the NSS. Enclosed please find a copy of our correspondence to Industry Canada for their consideration in the Canadian certification process for the ACR PLB-375.

Yours sincerely,

Michael Donald
Senior Analyst
